Student/Staff Support: Patient technical assistance, issue triage, clear communication, documentation, escalation

Security: CompTIA A+, cybersecurity fundamentals, privacy, confidential information handling

PROFESSIONAL EXPERIENCE

Caregiver / CNA | Healthcare & Residential Care Settings | 2024–Present

- Provide patient, dependable support in healthcare environments while following privacy, documentation, safety, and infection-control procedures.

- Use electronic and mobile workplace tools for schedules, shift information, documentation, and communication.
- Document information accurately and communicate issues clearly to supervisors and care teams.
- Troubleshoot routine workflow and technology issues and escalate problems appropriately.
- Work patiently with individuals who have different needs, communication styles, and levels of comfort with technology.

Universal Banker | Credit Union of Southern California | 2021–2024

- Supported customers with account, online-banking, card, and technology-related questions while protecting confidential information.
- Used Windows-based systems and multiple software applications to process transactions, document activity, and resolve user issues.
- Troubleshot common user and system issues, investigated discrepancies, and escalated problems when necessary.
- Maintained accurate records and detailed documentation in a regulated environment.
- Explained technical and procedural information patiently to customers with different levels of technical knowledge.

Teller | Wells Fargo | 2018–2020

- Provided high-volume customer support while maintaining accuracy, privacy, and security standards.
- Used computer systems and internal applications to research information, resolve issues, and document activity.
- Followed established troubleshooting, escalation, and security procedures when problems or unusual activity were identified.
